New York State’s Population Health Improvement Program (PHIP) work is vital to advancing the NYS Prevention Agenda and the State Health Innovation Plan. PHIP focuses on improving the health of the population by bringing people together to communicate and collaborate, promoting health improvement strategies known to work, and helping people use data to guide their decisions.

PHIP enables 11 regional contractors to convene stakeholders and establish neutral forums for identifying, sharing, disseminating and helping implement best practices and strategies to promote population health and reduce health care disparities in their respective regions.

THE FY2020 EXECUTIVE BUDGET PROPOSES TO DISCONTINUE PHIP.

Unless action is taken, PHIP’s current contract will be prematurely ended on March 31, 2019, causing a loss of valuable resources to local communities.

PHIP IS A VALUABLE RESOURCE TO NEW YORK STATE!

Visit our website for more information and ways to reach out to your legislators to help restore population health funding.

POPHEALTHWNY.ORG
Mental Health First Aid is a national program to teach the skills to respond to the signs of mental illness and substance use. Since 2015, we have sponsored 1,185 Mental Health First Aiders.

PROMOTING STRATEGIES KNOWN TO WORK - helping partners identify and deliver evidence-based interventions; providing trainings and technical assistance.

The Mental Health First Aid Professional Development for teachers is absolutely critical in preparing educators for the changing needs of the student population. The Mental Health First curriculum in our District is as important as any of the curricula that we need to teach in order to meet the needs of students.

Without this information our teachers, and more importantly our students, would be at a deficit that is morally and equitably unfair.

- Mark Laurrie, Niagara Falls City Schools Superintendent

HELPING PEOPLE USE DATA - sharing data and conducting data analysis to support county health departments, hospitals, and health systems.

Keys to Health provides a one-stop resource for online access to community health indicators, promising practices, funding opportunities, and resources that impact the health of our community.

It is our first stop when we have data collection to complete. It is so nice to be able to go to one place to get everything we need.
